

Software Developer

Teamflow GmbH | Location: **Kigali**

You want to take on responsibilities from day one? You are interested in working in a company with start-up structures, highly motivated colleagues, and established customers?

Then Teamflow might be right for you.

We are looking for a salaried full-time **Software Developer** in Kigali to join one of our teams as soon as possible.

What would be your job at Teamflow?

- You work as a member of an agile Scrum team and develop high-quality software for our customers in Germany

Why Teamflow is right for you

- Because there are few jobs where you can get so involved right from the start, take on responsibility, and personally develop so quickly.
- Because you will find a professional and collegial working environment with flat hierarchies.
- Because „team“ actually means something to us.
- Because we will significantly invest in your training.
- Because we take your onboarding seriously and provide you with an experienced colleague for the first few months to answer your questions and help you with problems on a daily basis.
- Because you will have a long-term perspective and can keep learning and developing yourself.
- Because many of us are at the “cutting edge“ professionally.
- Because you will receive a competitive salary, private health insurance, as well as 24 days paid vacation a year.
- Because you can work on international projects from our office in the center of Kigali.
- Because your equipment will be nothing to be ashamed of (a new MacBook Pro and a current iPhone).

What gets us excited about you

- You have experience in at least two of the following programming languages:
 - Java
 - C#
 - Python
- Ideally, you already have experience with cloud platforms such as Microsoft Azure or Amazon Web Services (AWS).
- Test automation and clean code is second nature to you.
- You are a team player and want to develop successful products with your cross-functional team.
- You are a self-starter, reliable and committed to high quality.
- You are interested in the latest trends and technologies and are open to work in a sometimes challenging intercultural context.
- You have a can-do attitude and roll up your sleeves to get things done.
- You have very good knowledge of spoken and written English, and you can handle yourself in a video call with our customers.
- You are legally allowed to work in Rwanda.

If you think that you are the right person for the job – despite not meeting all the requirements – we’d be happy to hear from you.
